DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 22 August 2007 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 13, 15, 17-23, 25-28 and 30-31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification fails to specifically identify "wherein the first and second lenses reach the desired reference point simultaneously in discrete individual steps of varying magnitude at a same time" and "wherein the first and second lenses ensure a sharp image at all time during the movement required to reach the desired reference point" as included in newly amended independent claims 13 and 25. The applicant is now relying on these limitations as criticalness to the patentability. As such, the examiner contends, absent specific

support in the specification, that this subject matter was not considered within the metes and bounds of the invention as originally filed. The dependent claims inherit the deficiencies of the claim from which they depend.

Response to Arguments

4. Applicant's arguments filed 22 August 2007 have been fully considered but they are not persuasive.

Applicant argues that page 3, lines 20-30 provide support for the first and second lenses reaching the desired reference point simultaneously in discrete individual steps of varying magnitude at the same time. The examiner respectfully disagrees. Although the cited paragraph discloses that the lenses are controlled simultaneously and that they each move in discrete individual steps of varying magnitude, there is nothing to suggest that they reach the desired reference point simultaneously or at the same time.

Further, nothing is disclosed in page 3, lines 20-30 or page 4, lines 14-19 that teach or suggest that the system ensures a sharp image at ALL time during the movement. Therefore the 112 rejection is proper and maintained.

Conclusion

5. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action

after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
